### LEARNING SITUATION

**Possible answers**

Playing sport is important to me because it helps me to stay fit. I also have a good time when I'm with my teammates. I think that national sports teams can create a feeling of belonging and unity among their supporters. Sport today is a multi-billion-dollar business that has a massive impact on local economies. It also supplies thousands of jobs across the world, from athletes, coaches and referees to vendors and company employees.

**8 USEFUL VOCABULARY**

**Picture A:** bandage, injured, recover, in pain, disappointed, knee

**Picture B:** arguing, persuade, penalty, stadium, referee, angry, change his mind, unfair

**Possible answers**

In Picture A, you can see that one player is lying on the court and he is in pain. You can tell he has injured his knee – I wonder if it's serious. I suppose he'll get first aid.

In Picture B, you can tell that the players are angry – the referee may have given them a penalty. They're probably trying to persuade the referee to change his mind, but most likely he won't let them influence his decision.

## COMPETENCE INTEGRATION Page 19

**Possible answers**

Doing sport has many benefits for the individual. Sport keeps a person fit and healthy, creates a feeling of confidence and can boost self-esteem. It plays an important role in maintaining health and controlling weight. In a sport like breakdancing, it can give an individual a way to express his or her feelings.
Society benefits from building sports stadiums, skateparks, etc., because it draws visitors and tourists, which increases business and creates jobs. Another benefit to society is the technology that is developed for some sports, for example, safety measures in Formula 1 racing, which can be useful to other industries, such as car manufacturers. In addition, famous athletes often have a lot of influence and can raise awareness of various social issues.

# UNIT 2

## LEARNING SITUATION Page 20

**Possible answers**

We are born curious and want to know more about the world.

In the past, people used to explore to look for new lands, gold and other precious resources.

Exploration helps us understand our place in the world.

Exploration leads to knowledge and understanding, and new experiences bring us new knowledge.

We want to explore to improve our understanding of Earth.

We explore to discover unknown places and species.

We want to explore to look for new sources of energy and make life better for future generations.

## COMPETENCE INTEGRATION Page 33

**Possible answers**

The deepest parts of the oceans haven't been fully explored, because we don't have the technology to do this. Investing in developing the technology would be worthwhile, as we can learn about the effects of climate change and pollution by studying the oceans. There might also be organisms deep in the sea that could provide cures for diseases.

Another place that hasn't been fully explored is Vale do Javari in the Amazon Rainforest in Brazil. Exploring and studying this area will teach us about the ecosystem and contribute to conservation.

## COMPETENCE INTEGRATION Page 49

**Possible answers**

Food brings people together because we eat food when we want to celebrate special events, such as a wedding or birthday. In South Korea, it is important for people to eat together, and this has led to the popularity of mukbang videos. Today, food plays an important role on social media, and influencers post appealing pictures of food to promote various places and events.

Food is often associated with religious festivals and holidays and historical events. By learning why special foods are eaten at certain times, we can discover something about a country's history or customs. In Sweden, for example, children get sweets on Saturdays, a tradition that started in the 1950s in order to control children's sugar consumption.

# UNIT 4

## LEARNING SITUATION Page 50

**Possible answers**

Being included means feeling both physically and socially part of a group. To make communities more inclusive, we should make our language more inclusive, which means being conscious of how our words may be perceived or affect others' feelings. We also need to acknowledge our prejudices and be aware of how they affect our actions.

Everyone should have the same rights, and to make communities more inclusive, there are ramps, Braille signs, accessible public toilets and transport, etc., so that disabled people can go about their daily life with as little trouble as possible.

1. False. The keywords are ***only use their hands***. *She uses her entire body to turn the music … .* (lines 6-7)
2. True. The keywords are ***audience***, ***attention*** and ***Galloway***. *It's a performance so powerful that sometimes all eyes are on her.* (lines 36-37)
3. False. The keywords are ***interpreters***, ***translate*** and ***spontaneously***. *To prepare for a concert, interpreters like Galloway must begin far in advance.* (lines 38-39)
4. True. The keywords are ***interpreters***, ***skilled*** and ***interpreting music***. *… the interpreter may lack the necessary skills*. (lines 49-50)

**3** 1. a The keywords are ***readers***, ***find***, ***information*** and ***paragraph 1***, so students need to decide what readers will think about the information given in this paragraph. In lines 4-6, it says that *a sign language interpreter begins to translate the song for the deaf and hard-of-hearing members of the audience.*
The answer is a. The writer thinks readers will be surprised that deaf people were attending a concert.
2. b The keywords are ***video rap battle*** and ***interpreter***. In the fifth paragraph, a rap battle is mentioned: *Translating the creative rhymes of hip-hop and rap is a challenge, especially when they're sung at incredible speeds. A great example is a viral video of Galloway in a rap battle with Twista … .* (lines 40-43) The answer is b because we can understand that Galloway signed Twista's lyrics.
3. d The keywords are ***Galloway*** and ***achieved her goal***, so students have to find when Galloway will feel that she has achieved her goal. In the last paragraph, it says that *Galloway's mission is to change all this. She's taking action to raise awareness of the right of deaf people to entertainment*. (lines 50-52)
So the answer is d.

**7** **USEFUL VOCABULARY**

**Possible answers**

**Picture C:** announcement board, confusing, frustrating, visually impaired, destinations, crowded, train station, audio information, difficult for the elderly

**Picture D:** confusing, challenging, frustrating, visually impaired, ordering food, audio information, difficult for the elderly, touchscreen

**Possible answers**

The pictures are similar because both show situations in which people with disabilities and the elderly could have problems. The pictures are different because the train station is much more crowded than the fast-food restaurant, so I think the train station would be more overwhelming.

In Picture C, this situation must be frustrating for the visually impaired because they can't see the announcement board. In Picture D, ordering food at this fast-food restaurant would be too challenging for the elderly, who probably don't know how to use touch screens, and in the end, they may end up not ordering anything.

**Possible solutions:**

In the train station, there should be staff to help the visually impaired get to their platform and board their train. There should be audio information for the visually impaired to know the right platform for their destination. In the fast-food restaurant, the visually impaired and the elderly should be able to order their food at the counter.

37 (out of 50) survey respondents claimed that the public transport service is either poor or very poor, so the vast majority of respondents are dissatisfied with the service. The conclusion that can be reached is that public transport in this area is a serious issue that needs to be improved.

## COMPETENCE INTEGRATION Page 63

**Possible answers**
When people care about making their cities and workplaces inclusive, it benefits society as a whole. It is important to make services accessible to everyone because no one should feel excluded. If a school has a policy of including people with disabilities and also adapts its curriculum to include students with learning difficulties, other students will become sensitive to and aware of differences between people. Inclusivity helps to make everyone in a society feel respected, valued and accepted, and also creates a sense of belonging.

## COMPETENCE INTEGRATION Page 79

**Possible answers**
I understand the basics of banking and finance, but I will still need a lot of help and advice about banking because this isn't a subject we learn about at school. I'd like to learn about the pros and cons of credit and debit cards, how to budget and how to save.
It would be great if we had Finance Parks like at some schools in the USA, but as far as I know, we don't have anything like that here. I think there might be online classes and tutorials on the subject, which could be a good alternative.

1. c The keywords are ***why***, ***couldn't***, ***understand*** and ***song***. In the first paragraph, it says why the writer was unable to understand the song: I *couldn't understand a word she was singing, despite my fluent Spanish. I was told that the lyrics of all her songs are in Quechua, the language of the Incas*. (lines 6-9)
2. c The keywords are ***surprised***, ***Quechua*** and ***endangered language***. In the fourth paragraph, it says what the writer found surprising even though Quechua is an endangered language: *Quechua is still used by ten million South Americans … . For this reason, I couldn't understand why it's on the United Nations list of endangered languages … .* (lines 29-33)
3. a The keywords are ***writer*** and ***explains***. In the fifth paragraph, the writer explains that Quechua … *is seen as old-fashioned and irrelevant. The stigma … makes plenty of parents refuse to speak to their children in Quechua … .* (lines 38-41)

**3** 1. The other answer is Quechua. The keywords are ***not the only answer***. In lines 29-30, it says what other language besides Spanish is spoken in these countries: *Quechua is still used by ten million South Americans … .*
2. The UN has a programme to save endangered languages, and in Cusco they are trying to encourage the people to speak Quechua.
The keywords are ***changes*** and ***Cusco***, which is mentioned in lines 48-49: *These days, there are Quechua radio stations and Quechua lessons at school.*
3. Flores wants young people to celebrate their roots and feel proud of both their language and their cultural heritage. The keywords are ***change***, ***Flores*** and ***young people***, and in lines 51-53, it says: *The message she wants to get across is that young people should celebrate their roots and feel proud, not ashamed, of their language and heritage.*

## COMPETENCE INTEGRATION Page 93

**Possible answers**

Schools ought to include cultural studies in the curriculum of their country with topics such as traditional foods, music, theatre and festivals. Schools can also promote appreciation of foreign cultures by holding events such as cultural festivals, which expose students to the food, music, language and other aspects of foreign cultures. Schools can also promote exchange programmes between Spanish and foreign students.

It is important for students to learn about the connection between language and culture, and be made aware of any endangered languages in their own country. For example, Galician has been recognised by UNESCO as an endangered language.

**6** **Possible answers**
TikTok has some negative effects on young people because the more they use TikTok, the more distracted they become in different areas of their lives such as paying attention in class, completing their schoolwork and losing track of time on TikTok.
Short videos on TikTok are shortening people's attention span, which is really negative for young people. TikTok can also have a negative effect on teens by encouraging them to participate in dangerous social media challenges.

I don't think it's a good idea to watch TikTok regularly as it's rather addictive: we may intend to spend 15 minutes and then end up spending two hours or more. That's problematic.

More possible words: assist, skilled, AI, cutting edge, treatment
**Picture D:**
efficient, replace humans, save time
More possible words: save money, improve productivity, no sick leave, reduce accidents

**TASK**

**Possible answers**
The robots in both pictures are similar because they are replacing humans.
One difference is that in Picture C, the robot is assisting an elderly woman and it looks more human, whereas in Picture D, the robots are assembling cars and do not look human at all.
If you ask me, I think it is a good idea to use robots to help the elderly because they can help them at home and help to keep them safe. Robots can also keep the elderly company and even play games with them. In addition, the woman won't feel lonely if the robot can interact with her.
In my opinion, using robots in Picture D is bad for employment because many workers may have been sacked and replaced by robots which are now doing their work.

## COMPETENCE INTEGRATION Page 109

**Possible answers**
Robots and AI will have a large part to play in education. Some teachers may be replaced with robots, but most teachers will be human. Many classes will take place online, although there will still be schools where students and teachers meet face-to-face in order to do projects, for example. In medicine, AI will be used to diagnose illness and disease at an early stage, and robots will do many more complicated surgeries. It might even be possible for families to have their own humanoid doctor in their home. Social media will become even more important in the future. Current social media platforms like Facebook may disappear, but new ones will take their place. Humans will no longer have to do any housework. Robots will do all the work and meals will be printed by 3D printers, using natural ingredients. In entertainment, I don't think robots will take the place of human actors. Computer-generated images and effects will be more sophisticated.
Self-driving cars will be very common within the next ten years. There might even be prototypes for flying cars. My life will definitely be affected by changing technology, but it's impossible to predict what my life will be like in ten years' time.

## READING Page 112

**1** **Possible answers**
New construction is causing land loss.
Urban areas now have less green space.
Because of climate change, there are more invasive species, which damage the ecosystem.

**2** 🎧
**Possible answer**
I think the writer's purpose is to explain why the elephants don't have tusks.

**3**

1. b The keywords are ***first researchers*** and ***not understand***. In paragraph II, it mentions what was not understood by the first researchers: … *there was still one mystery left: the tuskless elephants were all female.* (lines 20-22)
2. a The keywords are all the words in the sentence beginning, ***Elephants without tusks***. In paragraph IV, it mentions the dangers and problems faced by these elephants: *Being less efficient at finding food and water forces tuskless elephants to search larger areas.* (lines 40-42)
3. b The keywords are ***conclusion*** and ***writer***. In the last paragraph, the writer points out … *this story is a sad reminder that the interference of mankind can easily disturb the delicate balance of nature in ways that no one can predict.* (lines 54-57)

**4**

1. True. The keywords are ***fewer than ten per cent*** and ***survived the war***. … *wiping out over 90 per cent of the park's elephants*. (lines 8-9)
2. False. The keywords are ***evolution*** and ***within one generation***. … *humans had triggered an accelerated form of evolution in these elephants, all within one generation*. (lines 14-16)
3. False. The keywords are ***directly after the war***, ***found*** and ***gene***. *The answer came 30 years later, when scientists succeeded in mapping the elephants' genomes* … . (lines 24-25)
4. False. The keywords are ***Adil*** and ***agrees***. *I asked Adil whether not having tusks could actually be an advantage for elephants* … . *"Not really," he replied.* (lines 33-36)

4. False. Animals look for shelter when they want to rest.
5. True

### CRITICAL THINKING

**Possible answer**

The lack of tusks in elephants affects the ecosystem, as elephants play a vital role in the survival of smaller species of wildlife. Another example is pollution of the ocean which kills fish, so there is no food for other marine life.

## COMPETENCE INTEGRATION Page 123

**Possible answer**
As individuals, it's our responsibility to reduce our carbon footprint as much as possible. This means reusing, recycling and reducing the amount of plastics and other packaging we use. We can also use public transport more and avoid flying if there is an alternative (trains, ferries, etc.). We can also join environmental groups that raise awareness of environmental issues, although we need to be aware that some groups use violent and illegal methods to get their message across. Governments should be tougher on big corporations which emit carbon dioxide and should pass a ban on the use of fossil fuels. In its place, governments should promote the use of alternative sources of power.
